

Information to our fr-wlan VPN-access

In general:

As a basis, you'll need a successfully established connection to our network "fr-wlan". This includes an IP-address, which got automatically assigned to your computer by one of our DHCP-servers.

Address of our VPN server: **vpn.fr-wlan.de**

Setup description for Microsoft Windows XP:

You don't need any additional software to setup your VPN connection. Create a new connection by selecting "Start" / "Settings" / "Network Connections". Within the "New Connection Wizard":

- Click "next" to continue to set up a network.
- Select "Connect to the network at my workplace". ("VPN" is mentioned there.)
- Select "Virtual Private Network connection". (VPN = "Virtual Private Network".)
- Choose a(ny) name for this new connection to recognize this connection.
- Within the "VPN Server Selection" dialog: Use **vpn.fr-wlan.de** as the address of the computer to which you are connecting.
- Finish the setup. You can add a shortcut to your desktop if you want to.

You can use your VPN connection now. Enter user name and password into the (windows) dialog box and click "Connect". You don't have to use our webpage for login. Your VPN account is completely independent from it.
