

VPN setup information:

As a basis, you'll need a successfully established connection to your network "fr-wlan". This includes an IP-address, which got automatically assigned to your computer by one of our DHCP-servers.

VPN-server address: vpn.fr-wlan.de

Type of connection: VPN, more precisely: PPTP (Point-To-Point Tunneling Protocol)

Encryption: Up to 128 bit (MPPE 128)

Authentication: MS CHAP v2

VPN-connections, which use PPTP, are at least possible with:

- Microsoft Windows XP/2000
- Windows 95/98 (with dial-up networking upgrade 1.4)
- Linux und BSD (with PPTP Client)
- Mac OS X (via "Internet Connect")
